Grand River Ave (M-43)

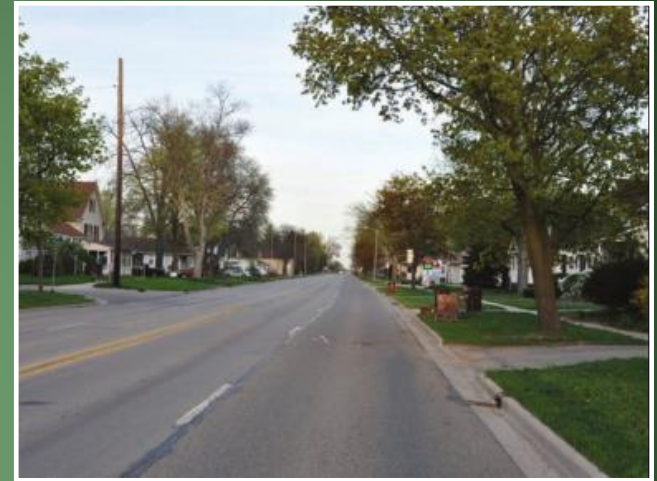

Road Diet

Work Session

Grand River Ave (M-43)

Road Diet

- 4 Lanes to 3 Lanes
- Center Turn & Bike Lanes
- Improve N & S Putnam Traffic
- Next Steps
 - Geometrics & Parking Impacts
 - Cost to City
 - Public Input
 - Work with MDOT to Implement

MDOT Recommendation

- **M-43/Grand River Road Diet**
 - One east bound lane, one west bound lane, one center turn lane from City limits to City limits
 - Provides room for a bike lane
 - Improved pedestrian safety, particularly at the four corners
 - Re-striping done as part of MDOT's striping program
- **Center Turn Lane on N and S Putnam between High and GR, and Middle and GR**
 - Addition of a center turn helps traffic flow and pedestrian safety
 - Likely will lose some on street parking spaces on the west side of S Putnam
 - Re-striping would be expense of the City
